

WIDE, CLEAR, NATURAL VISION FOR EVERY PATIENT.

Augen High Definition Progressive Lenses give patients wider, clearer, more natural vision, regardless of their prescription or frame preference. You can choose Augen progressives with confidence, knowing they deliver the consistent quality and true HD performance your patients expect.

- **HD Short Corridor Progressive 8/12** – for patients who prefer smaller fashion frames and rely primarily on close-up and distance vision

- **HD Trinity Spacia™ Progressive** – for wearers who rely on mid-range and distance vision in professional or outdoor environments

- **HD Progressive 13/17** – for patients who need easy adaptation and want excellent, reliable vision for all-day wear

Augen High Definition Lenses®

HD PROGRESSIVE LENS SERIES

Giving wearers greater visual detail and wider fields of natural clear vision.

HD  **LENSES**

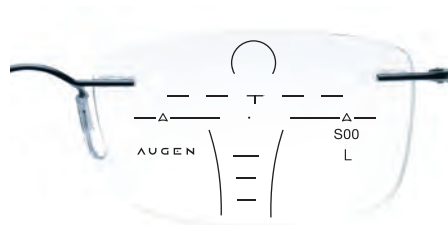

HD SHORT PROGRESSIVE 8/12

Better Vision in Small Frames

- Unprecedented 8mm corridor – the shortest now available.
- Carefully balanced zones of vision throughout the lens.
- Generous near zone high up in the lens where it matters most in small frames.
- Clear, ample distance viewing for comfort during everyday activities.
- Quick adaptation ensures ease of wear regardless of frame size.
- 12mm recommended minimum fitting height.

Available in Trivex®, Trivex Transitions® and Hard Resin

+1.00 to +3.00 adds in 0.25 diopter steps

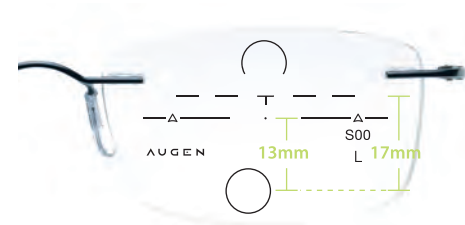

HD TRINITY SPACIA™

Spacious Mid-Range for
Active Presbyopes

- Extra-wide, crisp intermediate vision ideal for computer users and professionals who rely primarily on mid-range vision.
- Wide, spacious distance vision for extended comfort in outdoor environments.
- Ample, balanced near vision for comfortable close-up tasks.
- Super-soft design for minimal peripheral distortion and easy adaptation.
- 22mm recommended minimum fitting height.
- Frame B Measurement 33mm or more.

Available in Trivex®

+1.00 to +3.00 adds in 0.25 diopter steps

HD PROGRESSIVE 13/17

Fast Adaptation in an
Easy-Wear Design

- Aspherized curves vary based on Rx strength and add power for a better fit for myopes and hyperopes.
- Soft design minimizes peripheral distortion, allowing an easy visual transition through the viewing zones and ensuring quick, easy adaptation.
- Moderate 13mm corridor allows greater flexibility in selecting smaller frames.
- 17mm recommended minimum fitting height.

Available in Trivex®, Trivex Transitions®, Augen Parasol™ Photochromic and Hard Resin

+1.00 to +3.00 adds in 0.25 diopter steps
