### Patients Take on Life. With Trivex®

Offer your patients a lens material with the best foundation for their daily vision needs. Only Trivex provides the complete package of superior visual performance with unsurpassed strength in an ultra-lightweight material.

And with Augen Centurion™ Series lens designs in Trivex, you can be sure your patients are getting the best combination of optics, protection and comfort.

### Crisp, Clear Vision

With a high Abbe value of 45, Trivex ensures exceptional optical performance when precise vision quality is needed. Combined with Augen aspheric designs and free-form processes, patients with Augen lenses in Trivex receive optimum visual performance for all their daily activities.

### Superior Strength and Safety

Trivex material offers unsurpassed impact and breakage protection, providing superior safety for active adults and children. Trivex is also resistant to common household chemicals, ensuring durability of the lens surface.

### Ultra Lightweight

No lens material is lighter than Trivex, ensuring comfortable wear all day long.

### Easy Processing for Rimless Styles

Because of its strength and flexibility, Trivex is the ideal option for today's popular rimless frames.

### Compatible with Multiple Lens Options

Trivex material forms an ideal foundation for a full range of lens options, including anti-reflective coatings, prescription sunlenses and Transitions® photochromic.
